Enabling machine innovation

HDS high-performance AC
permanent magnet servo motor

— Enabling machine innovation
HDS high-performance
AC permanent magnet servo motor

HDS high-performance AC permanent magnet servo motors, combine pioneering design and advanced manufacturing technologies to exceed expectations in demanding and high dynamic applications by providing superior control precision and dynamic response.

Every aspect of HDS motors are developed and assembled in our state of the art facility, built on our experience in a broad range of industry and the demands for precision and resilience expected from motors in our ABB robots.

Together with ABB servo drives, HDS will deliver productivity and efficiency to customers in the new era of intelligent manufacturing.

HDS series servo motors

The HDS series provides outstanding performance with the combination of high torque and lowest inertia. Equipped with various high performance and resolution feedback devices, the HDS series meets the requirement of demanding applications and drives, bringing higher precision of control on speed, torque and position, ensuring reliability and stability of the whole control system.

Cooling Method Totally enclosed, non-ventilated; Fan-cooled

Magnet Material Ultra-high intrinsic coercive field rare earth

Insulation Class F

Mounting IMB5

Thermal Protection 3×PTC155

Exterior Paint Epoxy
Body in black, endcover in white with red ABB LOGO

Feedback Device Resolver
Incremental/absolute encoder
DSL single-cable absolute encoder

Ingress Protection (IP) IP54 without oil seal
IP65 with oil seal

Certification UL, CE

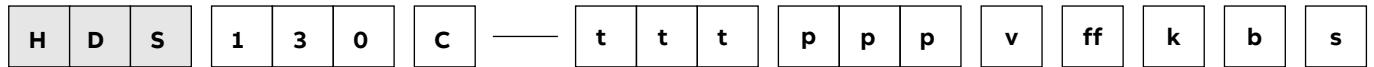

Features:

- High torque density
- Low cogging torque and torque ripple — excellent performance of low speed and system control
- Outstanding overload performance – 3 times peak torque, 4 times mechanical overload
- Epoxy resin potting technology on complete stator — compact size and maximum heat dissipation
- Fast dynamic response, accurate rotor balancing
- Wide speed range, optional high speed
- Precise flange and shaft machining, low noise and vibration
- Equipped with various feedback devices, including Hiperface DSL — single cable absolute encoder solution

Product information

Model description

Flange dimension

65 mm
100 mm
130 mm
180 mm
240 mm

Motor Options

W: Water Cooled
F: Fan Cooled
C: Large inertia^{*1}
- : Regular inertia

Rated torque

08: ≤ 8 Nm

Rated power^{*4}

1st 2 digits of power value by kW
17: 1.7 kW, below 10kW (HDS65/100/130/180)
15: 15kW, 10kW and above (HDS240)

Input voltage

A: 3ph 230 VAC
B: 3ph 400 VAC
C: 3ph 460 VAC

Feedback^{*3}

R: Resolver
E: Incremental encoder, w/commutation, 2500 ppr
S: Absolute encoder, single-turn, Smart Abs, 17 bit
M: Absolute encoder, multi-turn, Smart Abs, 17 + 16 bit^{*2}
S2: Absolute encoder, single-turn, Smart Abs, 23 bit
M2: Absolute encoder, multi-turn, Smart Abs, 23 + 16 bit^{*2}
G: Absolute encoder, single-turn, single-cable, Hiperface DSL
D: Absolute encoder, multi-turn, single-cable, Hiperface DSL
D3: Absolute encoder, single-turn, Hiperface SKS36, 128 sine/cosine periods per revolution
D4: Absolute encoder, multi-turn, Hiperface SKM36, 128 sine/cosine periods per revolution,
4096 revolutions measurable

Shaft end

K: Keyway (Half key balance)
N: No Keyway

Brake

B: With brake
N: Without Brake

Oil Seal

S: With seal
N: Without seal

Note:

*1, Large inertia types have the same dimensions as the corresponding regular inertia types.

*2, Smart Abs multi-turn absolute encoder requires external battery to operate, its feedback cable shall provide an external battery box. Please contact ABB for necessary customization needs.

*3, HDS series servo motors also provide the feedback encoders of Endat protocol, please contact ABB for configuration and motor types of EnDat feedback options.

*4, For motors below 10kW (HDS65/100/130/180), "04" = 0.4kW, "17" = 1.7 kW, etc.; for 10kW and above (HDS240), "15" = 15kW, etc.

Thermal time constant t_{th} (min)	18	18	28	28	28	28	23	23
Weight W(kg)	3.71	4.00	4.71	5.00	4.71	5.00	5.51	5.80
Number of poles p	10	10	10	10	10	10	10	10

Note: *1. Max speed is under the standard conditions defined in this catalog. The max speed in applications shall be co-decided by the input voltage of the drive, feedback encoder type, etc. For higher speed applications, please contact ABB.

*2. Excluding brake inertia.

*3. The torque constant K_t decreases in a non-linear manner as the torque increases, the K_t values are considered valid until approximately 2 times cont. stall torque T_0 .

*4. Excluding brake weight, slightly different among feedback types.

Product information

Performance curves

Motor performance curves and operation areas

The operation area of HDS servo motors is defined by performance curves in a 2-dimensional plane with coordinates of output torque and rotation speed. The performance curves of each type divide the operation area into continuous operation area and intermittent operation area.

- Continuous operation area: the area where the motor could operate for a long period without over-heating^{*1}. In the performance curves provided below, the black-colored, lower-positioned curve is the continuous performance curve. The area contained under this curve is the continuous operation area.
- Intermittent operation area: the area over the continuous area, in which motor can run for a short period of time^{*1} as in overload mode. In the performance curves provided below, the red-colored curves with input voltage marked (110 VAC, 230 VAC, 400 VAC or 460 VAC) are the peak performance curves. The areas between a specific peak curve and the continuous curve is the intermittent operation area by the corresponding input voltage marked. The time allowed to run a motor in the intermittent operation area is decided comprehensively by the operating environment, ventilation conditions and the drive capacity, etc.

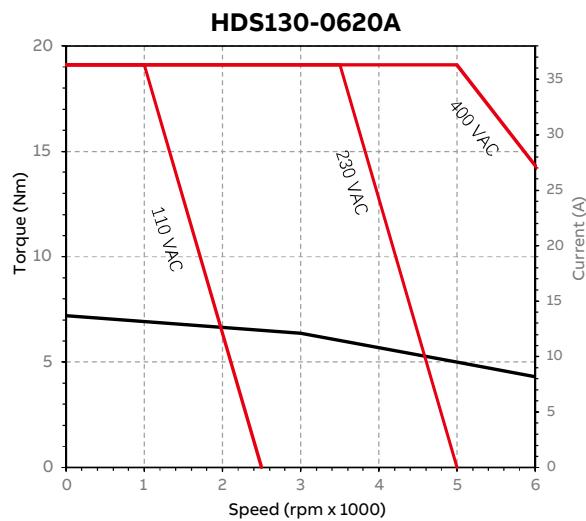

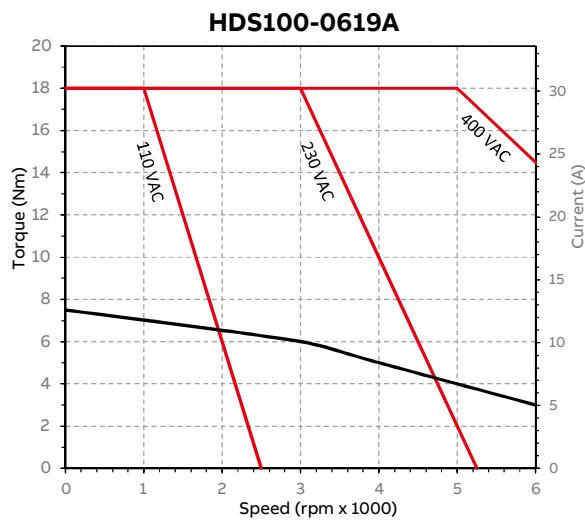

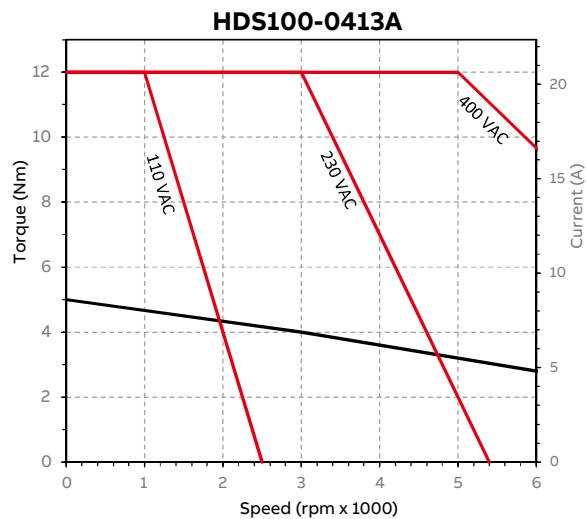

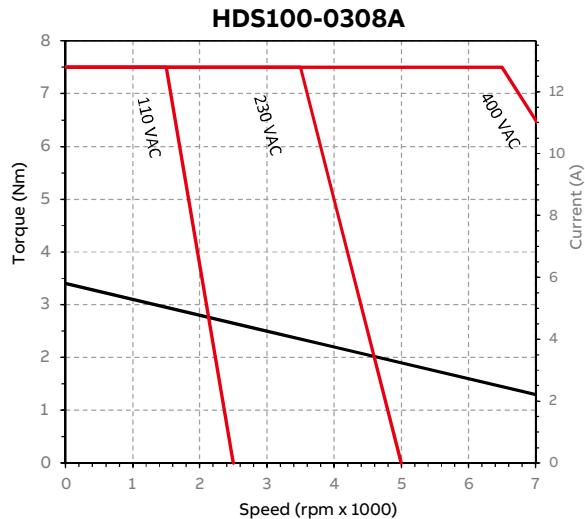

Note:

^{*1}, Refer to the General Technical Specification for Permanent Magnetic AC Servo Motor (GB/T30549-2014).

^{*2}, When the torque is higher than the continuous stall torque, the current value interpreted from the curves will be lower than the actual current, please refer to the data table in Technical specifications of previous section for accurate peak current values.

Service environment

Standard environment conditions for operation of HDS series servo motors

- Ambient temperature: - 20 ~ 40 °C
- Altitude: ≤1000 m
- Air pressure: 86 ~ 106 kPa
- Humidity: 40 ~ 80% (no dews)
- Same protection grade as motor frame

If the ambient temperature is higher than 40°C , or altitude higher than 1000m, please refer to the derating principles below. If any other conditions fall out of the above range, please contact ABB.

Cooling condition and derating

The performance specifications of HDS series servo motors provided in this catalog are obtained at an ambient temperature of 40° C, an altitude below 1,000 and with heat dissipation panel (aluminum alloy, dimensions^{*1} listed in the table below) equipped. If actual operation environment does not meet these conditions, derating shall be considered in light of specific heat dissipation conditions.

Motor	HDS65	HDS100	HDS130	HDS180
Heat dissipation panel dimensions L*W*H(mm)	210*210*5	300*300*8	390*390*10	380*380*8 (two panels)

In derating scenarios, the allowable torque/power of the motor shall be determined according to the table below^{*2} (when ambient temperature> 40° C or installation altitude > 1000 m). When the temperature value is not an integral multiple of 5° C or the installation altitude value is not an integral multiple of 500m, allowable torque/power should be determined using linear interpolation method or based on the next integral multiple.

Installation altitude (m)	Ambient temperature (°C)				
	<30	40	45	50	55
1000	1.07	1.00	0.96	0.92	0.87
1500	1.04	0.97	0.93	0.89	0.84
2000	1.00	0.94	0.90	0.86	0.82
2500	0.96	0.90	0.86	0.83	0.78
3000	0.92	0.86	0.82	0.79	0.75
3500	0.88	0.82	0.79	0.75	0.71
4000	0.82	0.77	0.74	0.71	0.67
4500	0.76	0.72	0.70	0.67	0.63
5000	0.69	0.67	0.65	0.62	0.58

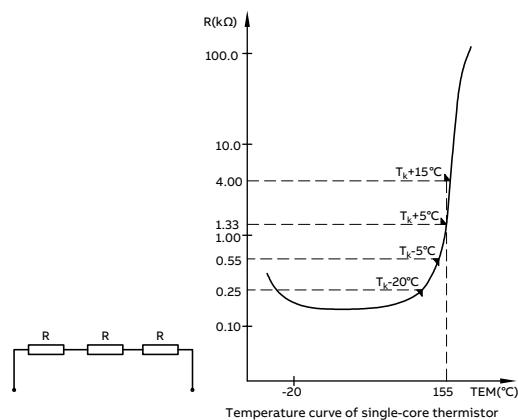

Note: *1, Refer to the General Technical Specification for Permanent Magnetic AC Servo Motor (GB/T30549-2014).

*2, If proper capacity derating operations are not done when motor's bearable load is exceeded, the servo motor will be overheated or damaged.

Product information

Thermal protection

HDS series servo motors has Class F thermal protection, with 3xPTC155 thermistor used to protect three-phase windings. The thermistor feature is shown below:

Features of 3xPTC155

Operating temperature	155°C
Resistance at 25°C	$\leq 300\Omega$
Resistance below 135°C	$\leq 750\Omega$
Resistance at 150°C	$\leq 1650\Omega$
Resistance at 160°C	$\geq 3990\Omega$

Product information

Bearing load capacity

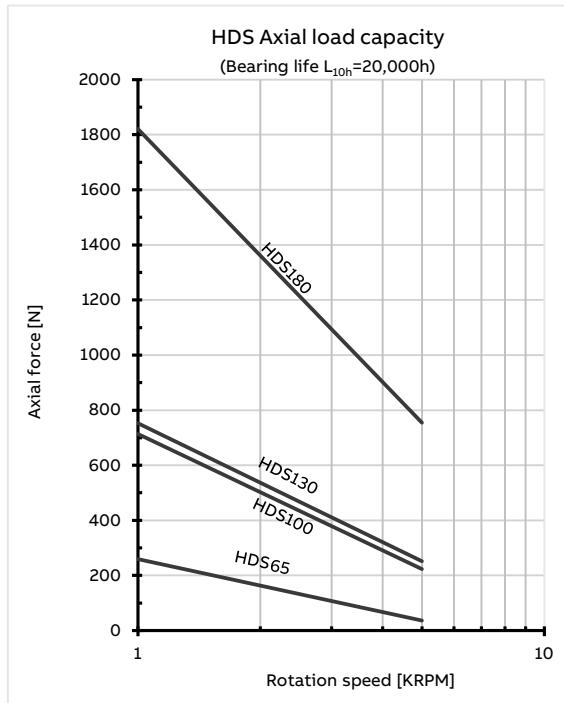

Bearing life: $L_{10h} \geq 20,000$ hours, C/P >15

L_{10h} : Rated basic life of bearing in ISO 281

C: Rated basic dynamic load

P: Equivalent dynamic load

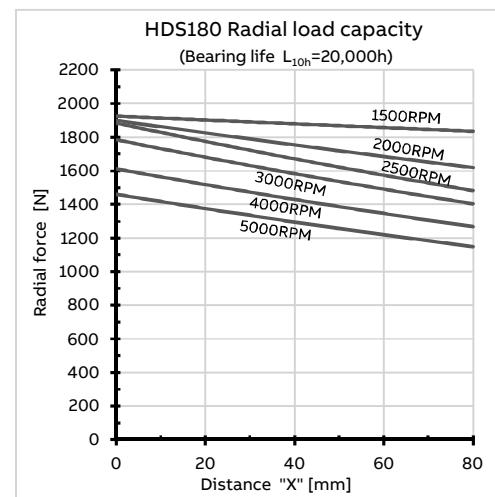

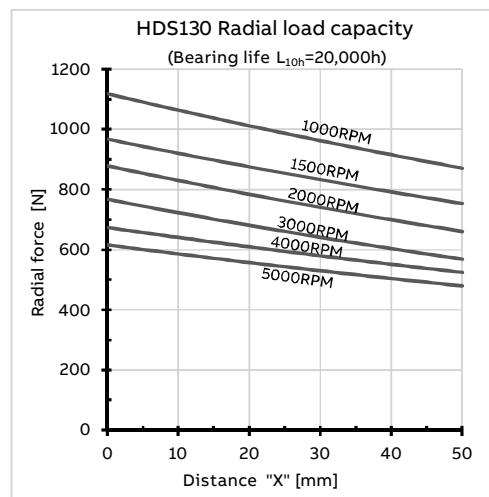

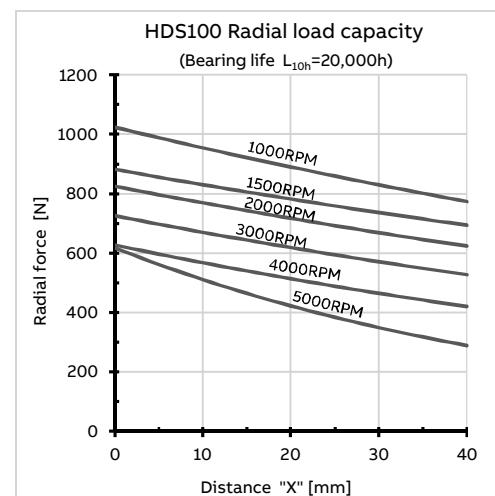

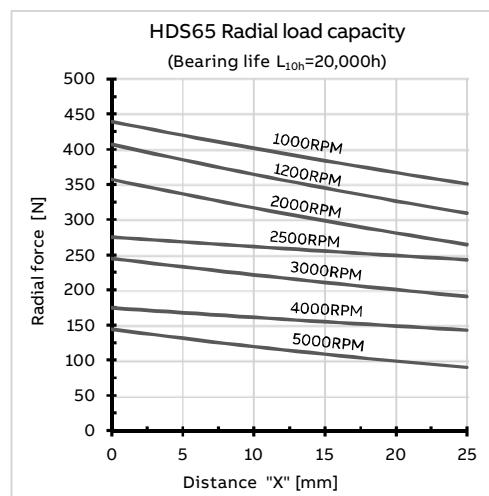

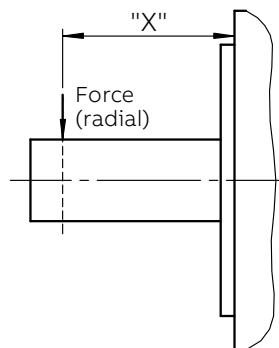

1) Axial load capacity – HDS65/100/130/180

Product information

Bearing load capacity

2) Radial load capacity – HDS65/100/130/180

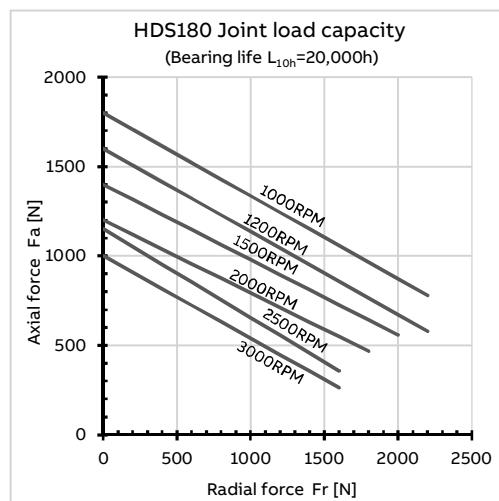

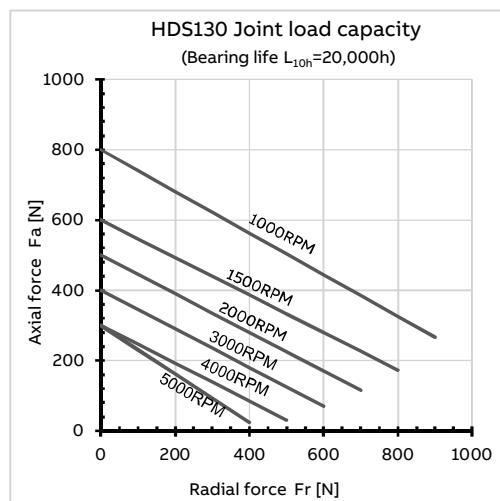

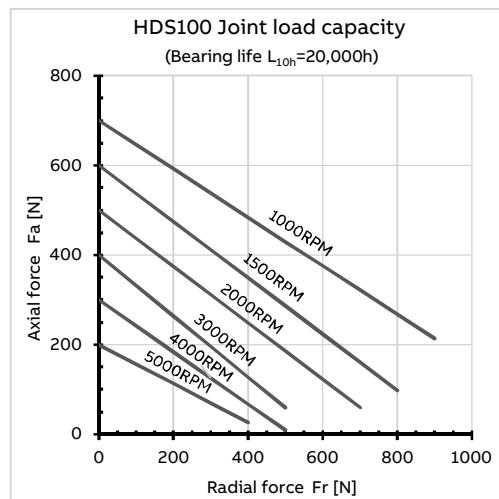

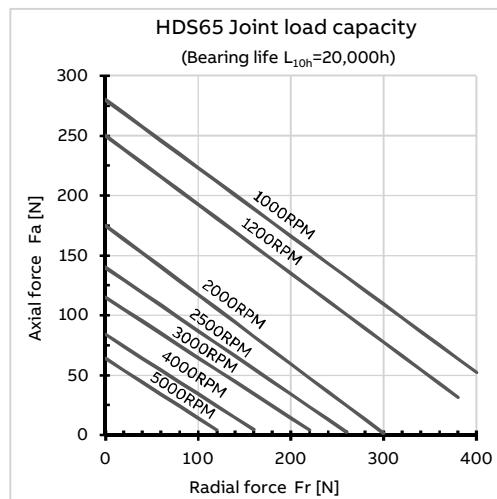

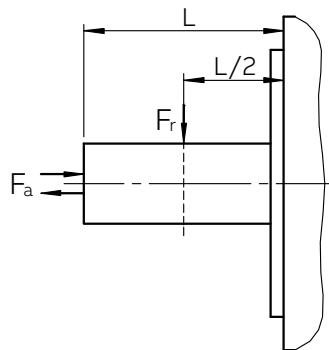

Product information

Bearing load capacity

3) Joint load capacity – HDS65/100/130/180

Load position: at 1/2 of shaft extension

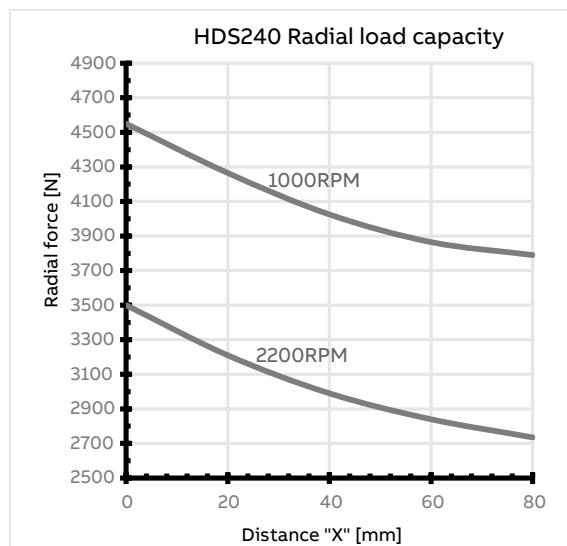

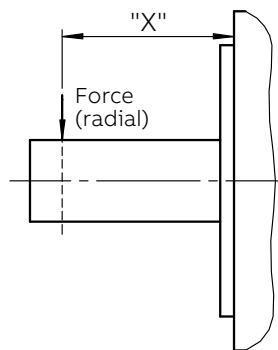

Product information

Bearing load capacity

4) HDS240 bearing load capacity

Maximum axial load capacity: 530 N

Radial load capacity:

Options and accessories

Feedback

HDS series provides standard feedback options including resolver, incremental encoder, absolute encoder (Smart Abs® or Hiperface®), Hiperface DSL®, and EnDat 2.2. Please contact ABB in case of a customized feedback requirement.

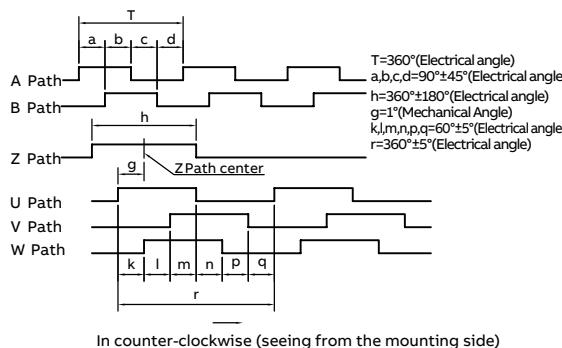

1) Resolver

Seeing from the mounting side, +θ is in counter-clockwise.

Input voltage	AC 5 Vrms / 4 kHz
Input current	40 mA max
Transformer ratio	0.5 ± 10%
Number of pole-pairs	1
Electrical error	6' max (mechanical angle)
Phase displacement	0 ± 10° (electrical angle)
Insulation resistance	DC 500 V, ≥ 100 MΩ
	20000 rpm (frame size HDS65)
Maximum speed	6000 rpm (other frames)
Operating temperature	-55° C ~ +155° C

2) Incremental encoder

Input voltage	DC+5 V±5%
Data output	Long distance drive (AM26C31 differential drive) Incremental orthogonal 2 path 10-polar Hall output
Resolution	2500 ppr
Precision	0.018° (mechanical angle)
Maximum electrical frequency	250 kHz
Maximum speed	6000 rpm
Operating temperature	-20°C ~ +85°C

3) Smart Abs absolute encoder

Input voltage	DC +5 V±5%
Resolution	Code S and M: 17 bits/turn Code S2 and M2: 23 bits/turn
Multi-turns ¹	16 bits
Memory	762 Bytes
Protocol	Smart protocol
Data transmission type	RS 485
Communication Baud rate	2.5 Mbps
Maximum rotation speed	6000 rpm
Maximum angular acceleration	80,000 rad/s ²
Direction of rotation	CCW (seeing from the mounting side)
Operating temperature	-10°C ~+85°C

*1, Smart Abs multi-turn absolute encoder needs external battery

4) Hiperface DSL absolute encoder

Input voltage	DC +7~+12 V
Input current	150 mA max (idle load)
Number of bids/rotation	18 bits (single-turn) 18 bits (multi-turn)
Recordable rotation number	1 rotation (single-turn) 4096 rotations (multi-turn)
Memory	8192 Bytes
Protocol	HIPERFACE DSL®
Data transmission type	RS 485
Digital position output frequency	0~75 kHz
Communication Baud rate	9.375 Mbps
Maximum speed	6000 rpm
Direction of rotation	CW (seeing from the mounting side)
Operating temperature	-20°C ~+115°C

5) Hiperface absolute encoder

Input voltage	DC +7 ~ +12 V
Input current	60 mA max (idle load)
Sine/cosine periods per revolution	128
Bits per revolution ²	19 bit (with 12-bit interpolation of the sine/cosine signals)
Recordable rotation number	1 rotation (single-turn) 4096 rotation (multi-turn)
Memory	1792 Bytes
Protocol	HIPERFACE®
Data transmission type	RS 485
Digital position output frequency	0 ~ 65 kHz
Maximum speed	12000 rpm (single-turn) 9000 rpm (multi-turn)
Direction of rotation	CW (seeing from the mounting side)
Operating temperature	-20° C ~ +110° C

*2, The resolution of Hiperface encoder is co-decided by sine/cosine periods per revolution and the interpolation of the sine/cosine signals

SPCB30016CF: 30 m feedback cable, 16-core.

Drive

MicroFlex e190

MicroFlex e190 is a compact high-performance servo drive, reimagined for future machine designs. MicroFlex e190 embraces all major motor feedback types, together with soft selectable Ethernet technologies. Its versatility provides a migration path for existing designs and future network-centric automation solutions.

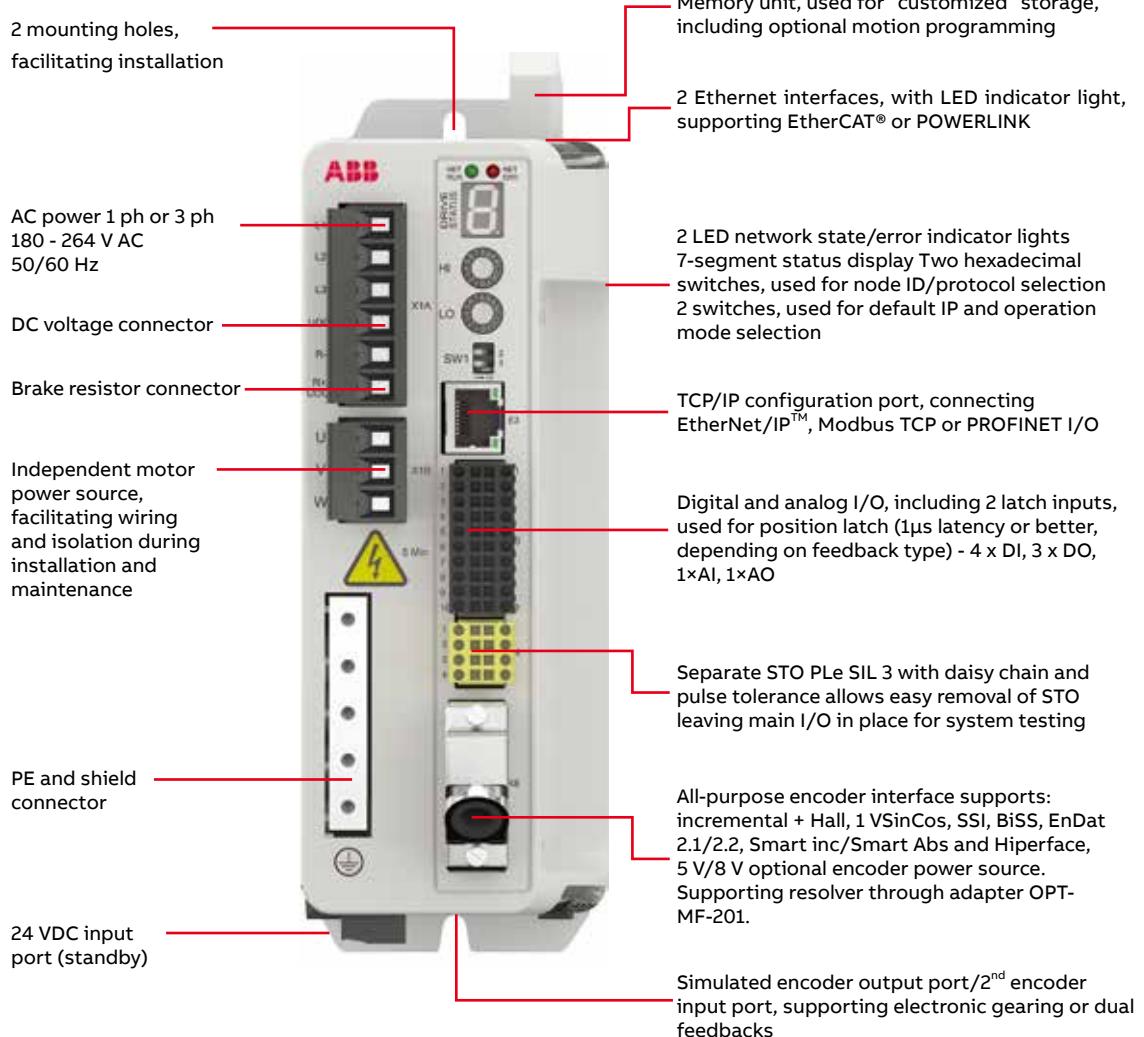

MicroFlex e190 is designed to carry today's control designs into the future. By supporting PTO and analog control, it provides flexible options for existing or legacy applications as well as a migration platform to Ethernet based control and 'IoTSP ready' machine designs.

MicroFlex e190 breaks the mould of similar products by rethinking usability throughout the product

lifecycle. MicroFlex e190 introduces a simpler approach to selection, installation, and operation.

MicroFlex e190 adds numerous improvements to the MicroFlex series, such as side by side flush mounting and a removable memory unit to prepare drive settings off-site or move settings from one drive to another. MicroFlex e190 supports all major Ethernet protocols (software selectable).

With features such as a second encoder input, an encoder output, and optional motion programming, applications such as electronic gearing, CAM, flying shear, labelling and registration control can easily be implemented without the use of an external controller, making it far more versatile than other drives in its class.

Drive

MicroFlex e190

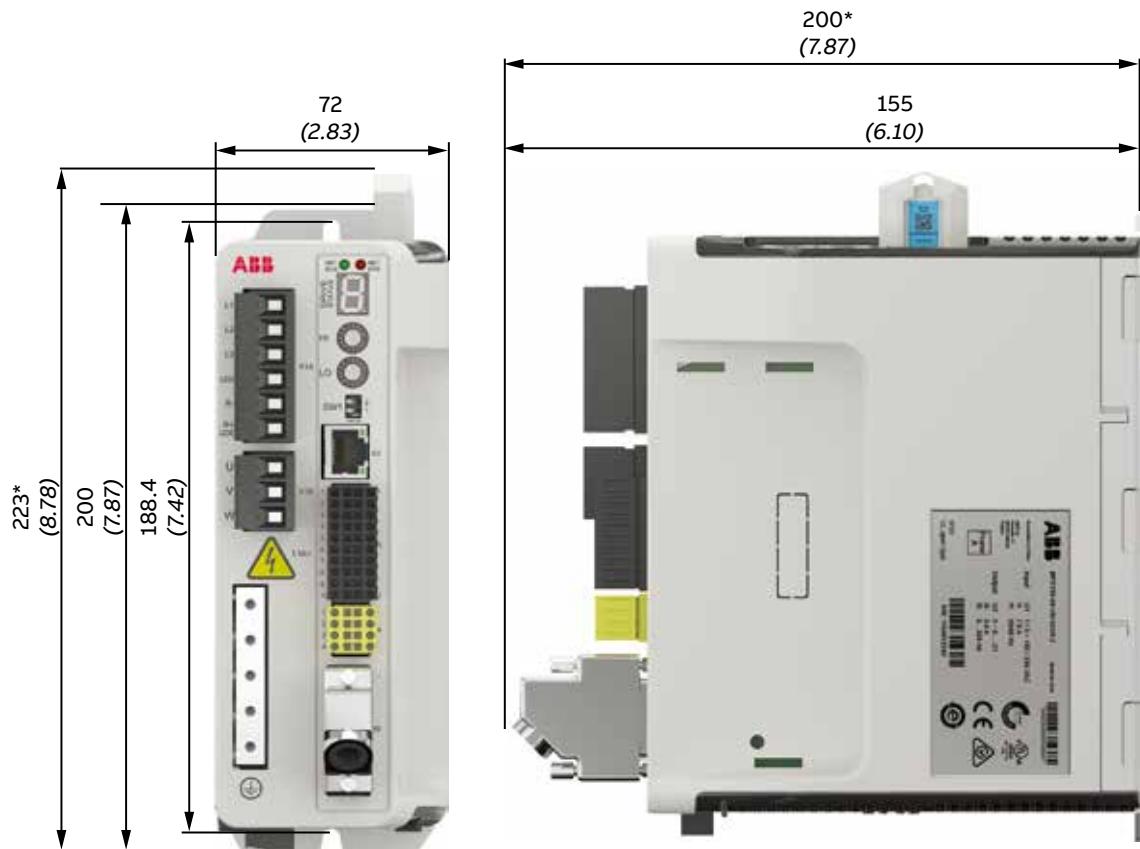

Technical parameters

Voltage/Frequency	AC 1 ph or 3 ph, 200 - 240 V AC ± 10%, 50 - 60 Hz ± 5%
Efficiency	>95%
PWM switching frequency / control	8 kHz / Space Vector Modulation
Motor types	Asynchronous motors (standard induction, servo) and synchronous motors (servo, high torque motor), linear servo motors
Braking resistor (external)	0.25 kW nominal / 2.7 kW Peak 10% duty with 57 W nominal (min 39 W max 100 W)
Product compliance	
Approvals	CE, cUL CE, cUR
EMC	EN61800-3 C2 emissions with external filter (50 m motor cable limit)
Environmental limits	
Operating temperature	1.6 A unit 0-50° C (derating applies to 45 to 50° C max) 3 / 6 / 9 A units 0-55° C no derating
Altitude	Rated 1000 m / 3300 ft De-rate 1.1% / 100 m (330 ft) > 1000 m (3300 ft)
Protection degree	IP20 cabinet installation
Safety	
Safe torque-off (STO) as standard	Two-channel STO to IEC61800-5-2, SIL3 PLe
I/O	
4 x digital inputs	Opto-isolated 24 V 2 inputs can be programmed as fast position latch inputs < 1 µs (feedback device dependent) or pulse direction inputs (max 2 MHz)
3 x digit outputs	Opto-isolated 24 V PNP. 50 mA per channel Configurable / programmable function
1 x ±10 V analog input 1 x ±10V analog output	12 bit (16 bit with oversampling). Analog speed / torque control with emulated encoder output
7 segment status display with sequenced error codes	For error and communications notification to quickly identify problems and minimize downtime
NET RUN & NET ERR LEDs	Indicate EtherCAT status of operation in accordance with EtherCAT Technology Group (ETG) guidelines
Communications	
EtherCAT (E2=IN E1=Out)	2 x RJ45 for daisy chain connection LED indication built into RJ45 sockets Drive profile: DS402 / IEC61800-7-1
Powerlink (E2=IN E1=Out)	2 x RJ45 for daisy chain connection LED indication built into RJ45 sockets Drive profile: DS402 / IEC61800-7-1
PROFINET IO	Communication with PLCs / Industrial PCs Drive operation can be customized with a MINT program
EtherNet / IP (E3 port only)	Note: CIP™ sync not supported Drive operation can be customized with a MINT program
E3 Ethernet configuration port	MINT PC support tools for host PC interfacing in Visual Basic, Visual C, LabView
Motor feedback	
Universal digital feedback	Incremental encoder + Halls, SSI (synchronization sequence interface), BiSS B, EnDat 2.1 / 2.2, 1 V pk-pk Sin / Cos, SmartAbs, SmartInc, Hiperface (8 V)
Dual encoder input	For line shaft following or dual loop control (position / velocity and commutation) to eliminate mechanical errors
Ethernet and motor encoder feedback interfaces	Highly integrated with minimum latency, optimized for demanding motion applications
Resolver	Supported by option OPT-MF-201 adapter

*Approximate size, extra space is allowed for feedback and other cable

Drive

MotiFlex e180

The MotiFlex e180 is a versatile motion control drive delivering high performance and capability you can depend on in a broad range of demanding motion control applications. Optimizing every move, the MotiFlex e180 and our motion control solutions enable you to improve your machine's productivity and end-product quality.

MotiFlex e180 delivers versatile motion control performance, capability and dependability to power machine innovations. Flexible connectivity with Ethernet and motor feedback technologies is highly integrated and optimized for demanding motion applications. With the MINT WorkBench PC tool you can quickly and easily customize the drive to the exact control requirements of your machine.

Technical specification

Supply connection	
AC supply	3-phase, 200 – 480 V AC +/-10% 50 / 60 Hz +/-5%
DC supply	270-650V DC +/-10%
Motor connection	
Voltage	3-phase output voltage
Frequency	0- +/-500 Hz
Motor control	Vector, U/f
Motor types	Asynchronous motors (standard induction, servo) and synchronous motors (servo, high-torque), linear servo motors
Switching frequency/control	4 - 8 kHz Space Vector Modulation
Braking power connection	
Braking Chopper	As standard in all types
Braking resistor	External resistor connected to drive
Product compliance	
CE	Low Voltage Directive 2006/95/EC, EN 61800-5-1: 2007 Machinery Directive 2006/42/EC, EN 61800-5-2: 2007 EMC Directive 2004/108/EC, EN 61800-3: 2004 + A1: 2012
UL	cUL/UL508C (2010) Power Conversion Equipment
Environmental limits	
Ambient temperature	
Transport	-40 to +70°C (-40 to +158°F)
Storage	-40 to +70°C (-40 to +158°F)
Operation	0 to +55°C (32 to 131°F), no frost allowed
Temperature	Above 40°C (104°F) with derating of 2%/1°C
Cooling method	
Air-cooling	Clean dry air
Altitude	0 to 2000 m (6560 ft) above sea level Derating above 1000 m (3280 ft) by 1%/100 m (328 ft)
Relative humidity	Maximum 95%, condensation is not allowed
Degree of Protection	IP20 acc. to EN 60529; Open type acc. to UL 508C
Contamination levels	No conductive dust allowed
Vibration	Sinusoidal vibration (EN 60068-2-6:2008); 2 to 9 Hz: 3.0 mm (0.12"); 9 to 200 Hz: 1g
Shock	Half-sin pulse (IEC 60068-2-27:2008): 10g for 11 ms
EMC	Category C3 with optional filter (according to EN 61800-3)
Functional safety	Safety torque off (STO according to EN 61800-5-2) EN 61508 ed2: SIL 3, EN 62061: SIL CL 3, EN ISO 13849-1: PL e

Rated value

MotiFlex E180 has four overload modes: 110%, 150%, 200%, 300%

I_{2n}	Select maximum continuous root-mean-square current in selected overload modes. Load work cycle rms current should be lower than the value.
I_{2max}	Maximum overload current at 60s-duration (110%, 150%) or 3s-duration (200%, 300%)

Note: *1, The drive with C and D dimensions must be equipped with power choke coil (AC or DC) at an overload of 110% and 150%.
